

SharePoint ShortUrl

Improve your SharePoint environment and make sharing information simple with **SharePoint ShortUrl**.

SharePoint ShortUrl allows the creation and use of vanity and shortcut hyperlinks. Too often and especially with large complex installations, the structure of a SharePoint site collection can lead to enormously long hyperlinks, which makes for ugly and error prone hyperlinks.

For example, compare the following hyperlink to a folder in a document library:

https://yoursite/clients/abc%20company/Shared%20 Documents/Forms/AllItems.aspx?RootFolder=%2fclie

Site Actions ▼

When you use **SharePoint** ShortUrl, it can also be shortened to: https://yoursite/clients

This makes emailing the link, putting it into documents or even saying it over the phone a much simpler and less error prone.

Using **SharePoint ShortUrl** a shortened hyperlink can be created to any Page, List Item, Document and View within SharePoint. Also to any external Url - including ftp and mailto.

With SharePoint ShortUrl you can create ShortUrl's directly from the Site Actions Menu and/or any List/Library Items Context Menu and/or Ribbon Menu (Share & Track). If a ShortUrl has already been created, you can instantly copy to the clipboard, email the link directly (the link will be opened in your email client) and edit the shortened hyperlink.

Standard SharePoint List

All the ShortUrl's are stored in a regular SharePoint List which allows for all of the standard List functionality of audit trails, workflow, security permissions, item approval and so on.

ShortUrl Features & Benefits

One of the great selling points of SharePoint for an organisation is the ability to keep documents and information centrally and the supporting mechanism for this is to send hyperlinks to colleagues and clients.

By having a cleaner way to manage lengthy hyperlinks, you will gain a very significant productivity improvement with hardly any effort or expense.
