

SharePoint ShortUrl

SharePoint Sense is pleased to announce the availability of our latest product for the SharePoint market, **SharePoint ShortUrl**.

SharePoint ShortUrl allows the creation and use of vanity and shortcut hyperlinks. Too often and especially with large complex installations, the structure of a SharePoint site collection can lead to enormously long hyperlinks, which makes for ugly and error prone hyperlinks.

For example, compare the following hyperlink to a folder in a document library:

<https://yoursite/clients/abc%20company/Shared%20Documents/Forms/AllItems.aspx?RootFolder=%2fclients%2fabc%20company%2fShared%20Documents%2fClient%20Requirements&FolderCTID=&View=%7b80C76B49%2dFA92%2d490E%2dAFBF%2d8A07F9C73CCE%7d>

When you use **SharePoint ShortUrl**, it can also be shortened to:

<https://yoursite/clients>

This makes emailing the link, putting it into documents or even saying it over the phone a much simpler and less error prone.

Using **SharePoint ShortUrl** a shortened hyperlink can be created to any Page, List Item, Document and View within SharePoint. Also to any external Url - including ftp and mailto.

With **SharePoint ShortUrl** you can create **ShortUrl's** directly from the Site Actions Menu and/or any List/Library items Context Menu. If a **ShortUrl** has already been created, you can instantly copy to the clipboard, email the link directly (the link will be opened in your email client) and edit the shortened hyperlink.

Standard SharePoint List

All the **ShortUrl's** are stored in a regular SharePoint List which allows for all of the standard List functionality of audit trails, workflow, security permissions, item approval and so on.
